- A. All offerors are reminded to acknowledge receipt of Amendment 0004 as stated in Block 11 of Standard Form 30.
- B. Line item 3000a has been updated on Attachment III to include delivery periods of 48 and 60 months.
- C. The Technical closing date is January 22, 2004 at 2:00pm local Fort Belvoir time.
- D. The Price closing date is January 28, 2004 at 2:00pm local Fort Belvoir time.
- E. Delivery period will start Meter read May 2004.
- F. The Bandwidth Clause is added to the solicitation in Part I, Clause 9 as follows:

**ELECTRICITY PRICING FOR QUANTITIES OUTSIDE ESTABLISHED LOAD BANDWIDTH
(DESC AUG 2002) (REV)**

- (a) The Government may consume electricity within the allowable variance in consumption specified in the contract (bandwidth) without adjustment to the contract price. For each line item, applicable bandwidth is the range from 10 percent above to 10 percent below (for Oct through May meter read dates (non-summer months)) and from 20 percent above to 20 percent below (for Jun through Sept meter read dates (summer months)) the estimate of consumption included in the Installation Data Spreadsheets for the line item for that month. If, in any month, consumption of electricity falls outside the contract bandwidth for any line item, there shall be an adjustment to the contract price. The adjustment methodology is specified below.
- (b) If, in any month, an Energy Deficiency occurs, an Energy Deficiency Adjustment shall be made. **Energy Deficiency** is the amount in kilowatt hours (kWh) by which consumption of electricity falls below the lower limit of the contract bandwidth for a line item for a month. **Energy Deficiency Adjustment** means the charge or credit calculated each monthly billing period for the Energy Deficiency. The Energy Deficiency Adjustment equals the Energy Deficiency times the contract price in cents per kWh minus the Average Market Price for the month. The **Average Market Price for a month** is the sum of Daily Market Prices for that month divided by the number of days during the month. A **Daily Market Price** is ___ (to be filled in by the offeror) ___ for a day, found on ___ (to be filled in by the offeror) ___ website (for the applicable zone where the impacted installation is physically located). If the result is a positive number, then the Energy Deficiency Adjustment will be a charge to the customer; if the result is a negative number, then the Energy Deficiency Adjustment will be a credit to the customer.

Expressed as a formula, the Energy Deficiency Adjustment is **EDA = ED x (CP - AMP)** where--

EDA is the Energy Deficiency Adjustment

ED is the Energy Deficiency

CP is the contract price

AMP is the Average Market Price

The Energy Deficiency Adjustment shall be calculated following the monthly billing period in which the energy was consumed and included on the next monthly invoice.

- (c) If, in any month, Excess Energy is consumed, an Excess Energy Adjustment shall be made. **Excess Energy** is the amount of electricity consumed above the upper limit of the contract bandwidth for a line item for a month. **Excess Energy Adjustment** means the charge calculated each monthly billing period for the Excess Energy. The Excess Energy Adjustment equals the Excess Energy times the contract price in cents per kWh minus the Average Market Price for the month. The **Average Market Price for a month** is the sum of the Daily Market Prices for that month divided by the number of days during the month. A **Daily Market Price** is ___ (to be filled in by the offeror) ___ for a day, found on ___ (to be filled in by the offeror) ___ website (for the applicable zone where the impacted installation is physically located). If the result is a positive number, then the Excess Energy Adjustment will be a credit to the customer; if the result is a negative number, then the Excess Energy Adjustment will be a charge to the customer.

Expressed as a formula, the Excess Energy Adjustment is **EEA = EE x (CP - AMP)** where--

EEA is the Excess Energy Adjustment

EE is the Excess Energy

CP is the contract price

AMP is the Average Market Price

The Excess Energy Adjustment shall be calculated following the monthly billing period in which the energy was consumed and included on the next monthly invoice.

NOTE: Bandwidth Clause applies to Malmstrom AFB only.
